

DVS 6000

"It worked better than anything we have ever used before ... We rolled the product into that tank and the results were great. I think they only put in two barrels. We've done this with other products in the past and we've put in up to four barrels and never did get to zero. All we were trying to do, really, was get it down to 100 parts (per million) and this went right down to zero. And as far as odours, they were gone."

*Gary Edwards, CCS Income Trust
Plant Manager at Drayton Valley, Alberta*

H₂S problems? Air Quality Concerns? Harsh Odour Environments?

DVS 6000 is your solution for eliminating H₂S, mercaptans and odours from your liquid hydrocarbons, sour water and gas.

Ideal for:

- Direct injection downhole, in flow lines & pipelines
- Truck mounted equipment
- Tanks, vessels, towers, scrubbers
- Safer to use (no formaldehyde)
- Non-corrosive
- Non-toxic spent by-product, easily disposed
- Easily shipped (air, ship, land)
- Non-flammable
- Freeze point below -45°C
- Mild odour
