

NEWS RELEASE

**DATE: July 21, 2004**

*FOR IMMEDIATE RELEASE:*

**DIVERSIFIED'S DVS 6000 SUCCESSFUL IN U.S. FIELD TRIAL**

Diversified Industries Ltd. (TSX Venture: DVS) is pleased to announce that Dorf Ketal Chemicals, LLC, of Houston, Texas, has obtained successful results in both lab tests and a recent field trial using Diversified's DVS 6000 hydrogen sulphide (H<sub>2</sub>S) scavenger.

Over the past 18 months, Dorf Ketal conducted lab tests to determine the efficacy of DVS 6000 in removing H<sub>2</sub>S and mercaptans from various hydrocarbon liquids. Their testing proved positive, resulting in the successful removal of H<sub>2</sub>S and light-end mercaptans from various hydrocarbon mixtures.

Most recently, in a field trial conducted by a Dorf Ketal client, DVS 6000 effectively eliminated the odours associated with light-end mercaptans contaminating 6000 US gallons of a gasoline/diesel fuel mixture.

The Dorf Ketal client poured 5 US gallons of DVS 6000 into a tanker truck then added 6000 US gallons of a gasoline/diesel fuel mixture contaminated with light-end methyl and ethyl mercaptans. The tanker truck embarked on a five-hour trip to its destination point with the gasoline/diesel mixture and DVS 6000 agitating with the movement of the truck. Upon arrival in Houston, Texas, the mercaptan odours were completely eliminated. The process of separating the gasoline and diesel fuel proceeded, resulting in products with value compared to the contaminated product initially loaded into the tanker.

The client expects to secure a contract based on this tanker trial, resulting in future sales of DVS 6000 in the United States.

Similar situations exist world wide with tankers, fuel barges, ocean tankers, and storage facilities.

DVS 6000 is a patented liquid scavenger for use in neutralizing H<sub>2</sub>S, carbonyl sulphide, methyl and ethyl mercaptans. Trucking firms, service companies and distribution companies like Univar continue to order DVS 6000 by the drum.

.../2

DVS 6000 is a superior H<sub>2</sub>S scavenger without the negative qualities of typical H<sub>2</sub>S scavengers like ammonia, caustic soda or formaldehyde-based scavengers. It is non-flammable, non-corrosive, and is not regulated under the *Transportation of Dangerous Goods Act of Canada*. In addition, it has a freeze point below minus 45 degrees Celsius, has a non-toxic zinc sulphide by-product and has a mild odour. We believe DVS 6000 is the safest and easiest to use H<sub>2</sub>S scavenger in the world.

Diversified Industries is a product development and marketing company specializing in unique technologies and solutions that target a cross-section of industries. The Company's business development strategy is based on acquiring, funding and aiding in the commercialization of unique technologies and products in order to build long-term value for its shareholders.

The TSX Venture Exchange does not accept responsibility for the adequacy or accuracy of this release.
